Management and Leadership

☑ **Environmentally Preferable Procurement**

RMI prints meeting announcements on paper certified by the Forestry Stewardship Council (FSC). Name tag holders used at meetings are made with EarthFirst® film which uses a resin made from corn and is recyclable, biodegradable and compostable.

☑ **Environmentally Preferable Products and Services**

We are an association that for the past two years has focused on sustainability in manufacturing by promoting success stories, leadership issues and "how to do" forums. About 1,200 people have attended these events. We do not have our own building so the many of the questions above do not relate to us. We do however promote all of the above to our members. See www.whatsnextrmi.com

Waste

☑ **Solid Waste/Material Use Reduction and Reuse**

Websites, email, social media, and other online communications are used to reduce paper use. Meeting participants are encouraged to reuse name tags.

Energy

☑   **Energy Efficiency**

We have replaced all light bulbs with energy efficient CFLs, saving 4,500 kWh, and reducing 6,930 lbs. carbon dioxide emissions over the life of the bulbs.

Transportation

☑   **Employee Commute**

Websites, email, social media, and other online communications are used to reduce employee commute miles.

☑   **Efficient Business Travel**

Most business is conducted by conferencing calls, website collaboration and email.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
