Management and Leadership

Annual Environmental Goals

Our goal this year is to make our building more energy efficient through a potential grant from the Maryland State Arts Council to get new siding, flooring and windows, which will help our building save on energy use.

Waste

Recycling

We recycle an estimated 1,040 lbs. of materials per year and have different trash bins to show people the different kinds of recycling that we have (chip bags, clear thin plastic, Styrofoam).

Composting

We have a compost bin by our picnic tables.

Energy

Energy Efficiency

We only change the temperature in the building twice a year to maintain energy efficient settings.

Water

Stormwater Management

We installed ponds in the rear of the museum property to help correct an erosion problem.

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
