**SUBJECT: SINGLE-INTERVAL SAMPLING WORK PLAN  
Inactive Exxon Facility #28077  
14258 Jarrettsville Pike, Phoenix, Maryland  
MDE Case No. 2006-0303-BA2**

Dear Mr. Ralston:

ExxonMobil Environmental & Property Solutions (ExxonMobil) is in receipt of the Maryland Department of the Environment's (MDE) March 29, 2019 "Approval of Groundwater Monitoring Reduction and Well Abandonment Request" (Approval Letter). The Approval Letter conditionally approves single-interval sampling for ten wells and requests a work plan detailing the preferred sampling methodology for wells previously sampled via discrete-interval methods (FLUTe™ or HydraSleeve™). In addition to the ten wells conditionally approved for single-interval sampling, MDE is requiring continued sampling of six wells originally proposed for abandonment. Single-interval sampling methodology is also proposed for these six wells, for a total of 16 monitoring wells.

### **Proposed Sampling Methodology**

#### HydraSleeve™

For wells currently sampled via discrete-interval or composite HydraSleeve™ at multiple depths, Kleinfelder, on behalf of ExxonMobil, proposes to collect samples from the interval with the highest concentration or, if concentrations are substantially the same across intervals, from the middle of the screened/open interval in the well. This proposal is consistent with Flowchart 2 from the June 13, 2018 Order of Resolution.<sup>1</sup> The table below provides the proposed sampling depth for 15 HydraSleeve™ wells. Historical analytical data can be found in attached Table 1.

FLUTe™

For the one FLUTe™ well (MW-56C) conditionally approved for single-interval sampling, samples will be collected from the existing FLUTe™ apparatus at the interval below. The FLUTe™ liner will remain in-place until this well is approved for abandonment.

Upon MDE approval, the above sampling method will be initiated on a quarterly schedule for the wells listed above.
